

Are Your Fixtures and Gauges Costing You Extra?

They are costing you if they are:

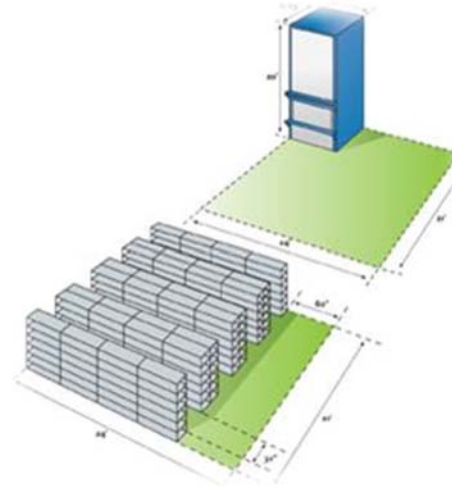

- Taking up production space
- Being stored far from line side
- Unprotected
- Not being tracked with inventory software

Save Space and Time without losing Quality

How It Could Be:

- All fixtures and gauges are stored in a fully automated system
- Fixtures and gauges are fully protected from accidental damage
- All fixtures and gauges are stored line side for quick access
- A High-density storage system requires less 100ft per model
- Inventory software manages inventory control and accuracy

The Savings:

- Inventory floor space is reduced by 60-80%
- Process costs are reduced by quick access
- Process costs are reduced by no accidental damage
- Inventory control is improved by 80%
- Inventory accuracy is improved up to 50%
