

Tooling Storage Methods of the Past are Costly

Is your Tooling Storage Room costing you money?

Before to After

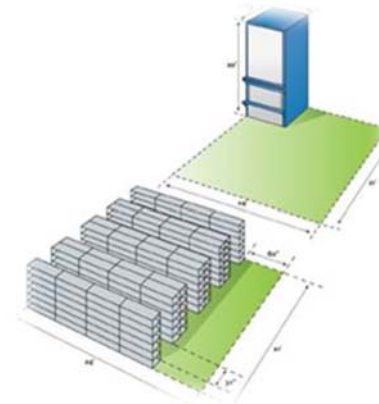

How It Could Be:

- Tooling is stored in a fully automated system
- High-density storage system requiring less 100ft per model
- Inventory software manages inventory control and accuracy

BEFORE

AFTER

The Savings:

- Employee costs are reduced by as much as 80%
- Process costs are reduced by reducing down-time
- Inventory floor space is reduced by 60-80%
- Supply usage is slashed by 5-10%
- Inventory accuracy is improved up to 50%
- Allows a reduction in inventory of 12-18%
